Academic Highlights

Early Years

“Freedom to Play, Freedom to Grow”

As the school reopened, our outdoor play space came alive with the joy of play. All eight sections came together, sharing a vibrant outdoor environment filled with exploration and discovery. Our young learners immersed themselves in climbing, balancing, building, experimenting, and discovering at their own pace. They embraced new experiences, took thoughtful risks, uncovered their own capabilities, and built confidence and resilience through every adventure.

Just as meaningful as the play itself was the joy of reconnecting with friends. Children eagerly reunited with classmates and bus buddies, filling the play space with laughter, collaboration, and a genuine sense of belonging.

Outdoor free play has now become a cherished daily ritual, marking the close of each school day before we gather together for our closing story. It offers children a joyful transition, allowing them to end the day with freedom, movement, and meaningful exploration.

The biggest takeaway?

Every day ends with the same excited question: "Ma'am, when do we get to go out and play?" It reminds us of a simple truth: Play is the work of the child, and through play, learning unfolds naturally. When children are free to play, they are free to learn, grow, and thrive.

Academic Highlights

Primary Years

“Media Through Many Lenses: Expert Panel Session”

As part of the Media Unit, **Grade 5** learners engaged in an inspiring Expert Panel Session with professionals from diverse media-related fields, including radio broadcasting, advertising and marketing, digital content creation, filmmaking, photography, performing arts, publishing, educational technology, and wellness.

Through authentic conversations, students deepened their understanding of the role and elements of media, explored how media has evolved over time, and examined the diverse perspectives and influence media has on individuals and society. The session encouraged learners to think critically about the power of media, appreciate its evolving nature, and make meaningful connections between classroom inquiry and the real world.

Middle Years Programme

“Drive It Like a Physicist” (Grade 9 - Integrated Sciences)

The "Drive It Like a Physicist" maze activity helped students connect Biology and Physics through a fun, hands-on challenge. A blindfolded walker navigated a maze using verbal guidance, demonstrating how the brain, senses, and muscles coordinate movement while applying physics concepts such as vectors, distance, displacement, and motion.

The activity promoted critical thinking, communication, teamwork, and an understanding of how scientific concepts work together in real-life situations.

Academic Highlights

Diploma Programme

“Grade 11 - Fresher’s Fiesta”

Grade 12 students organized and hosted the Freshers' Party to warmly welcome the Grade 11 students. They planned engaging activities and performances, fostering camaraderie and creating a memorable start to the DP journey.

Mavericks Learning Center

“Magic met Science this month at MLC”

Our young scientists stepped into the chemistry lab to discover that every "magic trick" has a scientific explanation. From learning laboratory safety and identifying equipment to conducting exciting experiments, students explored the wonders of chemistry through curiosity, careful observation, and hands-on investigation. Every experiment sparked questions, inspired discoveries, and proved that science is truly magical.
